

Biosolids Management Policy Statement

NEO commits to managing a biosolids program that produces compost that exceeds regulatory requirements and meets the expectations of diverse markets. This program will be protective of the environment, sustainable, and fiscally sound. NEO will maintain excellent relationships with all stakeholders, and seek to continuously improve its processes and products.

NEO will implement this policy by:

- **Following the Code of Good Practice for biosolids developed by the National Biosolids Partnership.**
- **Providing training opportunities to personnel associated with the biosolids management programs.**
- **Maintaining an environmental management system for Hawk Ridge Compost Facility and its associated support functions including periodic evaluation of the transportation and processing functions.**
